

VANSH THAKUR

✉ vthakur.290905@gmail.com  linkedin.com/in/vansh-thakur-vans30m  github.com/Vans30m  Portfolio

Education

Chitkara University

B.E. in Computer Science

Expected Graduation: 2028

Punjab, India

Govt. Model Sen. Sec. School

Class XII

2022 – 2023

Chandigarh, India

Saint Soldier Divine Public School

Class X

- 2021

Panchkula, Haryana

Achievements

Google Arcade

- Successfully completed various skill-building quests and challenges within the Google Cloud Arcade program.

Professional Certifications

- Introduction to CyberSecurity
- Impact Measurements Management for the SDGs

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, Embedded C

Frameworks & Libraries: React, Next.js, Node.js, Express, Tailwind CSS

Databases & Tools: PostgreSQL, MongoDB, Docker, Git, GitHub, REST APIs

Hardware & Core: Arduino Uno, Piezoelectric Sensors, Microcontrollers, System Design, DSA

Projects & Engineering Work

FinPulse AI | *Vanilla JS, Tailwind CSS, REST APIs, AI Models*

- Engineered a high-speed financial market intelligence platform leveraging semantic AI models to map, analyze, and categorize real-time data flows.
- Optimized frontend client-side rendering to achieve a Lighthouse Score of 95+ while maintaining system latency under 42ms.

FocusoraHQ | *React, Tailwind CSS, JavaScript, Git*

- Co-developed a comprehensive web application designed to enhance personal productivity and focus management.
- Built a responsive UI utilizing React modular hooks to manage task states, integrated timed sessions, and optimized rendering layouts using Tailwind CSS.

Zrythex-Core | *C++, Object-Oriented Programming, System Architecture*

- Architected a modular C++ computational environment focusing on low-level memory handling, fast runtimes, and algorithmic logic mapping.

Hardware & Embedded Systems

Autonomous Floor Cleaning Robot | *Embedded C++, Microcontrollers, Actuators, Sensors*

- Designed and built an intelligent autonomous cleaning unit utilizing hardware sensors to map spatial environments and prevent collision patterns.

Smart Energy Tile Harvesting System | *Arduino UNO, Piezoelectric Plates, Circuit Design*

- Developed an ecological energy-harvesting solution engineered to capture kinetic pressure from human footsteps using high-sensitivity Piezoelectric elements.

Coding Profiles & Problem Solving

LeetCode (leetcode.com/u/Vans30m)

- Successfully solved **200+** Data Structures and Algorithms problems, showcasing strong logic and optimization skills.

CodeChef (codechef.com/users/sweet_brace_56)

- Achieved a **3-Star Coder** rating through consistent performance in timed competitive programming contests.

GeeksforGeeks (geeksforgeeks.org/profile/vans30m)

- Secured a coding rank of **1000+**, demonstrating mastery in technical computing fundamentals.
