Summary

Software Engineer - Full Stack specializing in scalable web applications and AI-integrated systems using React, Node.js, PostgreSQL, and LLM APIs. Strong foundation in data structures, algorithms, and modular architecture, with experience building real-time collaboration tools and efficient backend services.

Technical Skills

Programming Languages: Java, C++, Python, JavaScript, TypeScript, Embedded C

Frontend: React.js, Tailwind CSS, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, WebSockets, Socket.IO, RESTful APIs

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM, Neon

AI & LLMs: Google Gemini API, Groq Cloud

Developer Tools: Git, GitHub, Vercel, Render, Postman

Libraries & Core: EmailJS, Firebase Authentication, Microcontrollers

Projects & Engineering Work

FinPulse AI - TypeScript, Prisma, PostgreSQL, AI Models

🌐 Live 🐙 GitHub

- Architected an AI-driven financial analytics platform that delivers personalized user insights and real-time market sentiment analysis to inform investment decisions.
- Architected a scalable backend using REST APIs and PostgreSQL to process real-time market data, ensuring seamless and persistent data management for users.
- Deployed an intelligent financial assistant and RAG architecture, enabling contextual user support and automated real-time news summarization.

Xplorism - React, Node.js, Express.js, PostgreSQL, Gemini AI

🌐 Live 🐙 GitHub

- Engineered an intelligent trip-planning website that dynamically generates customized itineraries by evaluating user-defined parameters such as destination, budget, and travel style.
- Orchestrated the integration of multiple third-party APIs—including Leaflet, Open-Meteo, and Gemini AI—to construct a rich, context-aware application featuring interactive mapping and live weather forecasting.
- Engineered a real-time collaborative workspace with secure document encryption and expense tracking.

FocusoraHQ - React, Tailwind CSS, JavaScript, MongoDB

🌐 Live 🐙 GitHub

- Spearheaded development of a comprehensive productivity web application, collaborating with a team to build focus-management tool.
- Built a productivity platform with Pomodoro timer, collaborative study rooms, blogs, and analytics.

Education

Chitkara University, Punjab, India

B.E. in Computer Science

Expected Graduation: May 2028

(9 CGPA)

Coding Profiles

LeetCode

Successfully solved **200+** Data Structures and Algorithms problems, showcasing strong logic and optimization skills.

GeeksforGeeks

Secured a coding rank of **1000+**, demonstrating strong technical computing fundamentals.

Professional Certifications

- Red Hat System Administration I and II - Red Hat
- Computer Architecture Essentials on Arm - Arm
- Prompt Engineering for ChatGPT - Vanderbilt University
- Introduction to Docker and Kubernetes - Cisco CSR
